Forklift Training Courses Markham

Forklift Training Courses Markham - Our forklift operator safety training has been tailored for illiteracy, thereby cutting the training time in half. We provide train the trainer, forklift training certification and lift-truck operator driver safety training evaluation programs offer thorough, regulation-compliant training in industrial-powered fork truck safety and operation. Lift truck pedestrian safety is offered too.

We have a highly skilled group of professional trainers to be able to make certain that your employees are well-trained. The certification is delivered on site by one of our certified instructors. Those training will learn how to recognize possible hazards and carry out safety inspections needed for the efficient and safe utilization of a powered industrial lift truck.

Forklift Training Guidelines
It is vital that all workplaces making use of forklifts have the following checklist or one equivalent on the premises. If all of the safety rules are being followed, each of these questions should be answered with a "yes". A "no" to whatever question indicates a procedural flaw that could cause injury, damage to equipment or accident.

1) Is the forklift operating area separated from pedestrian traffic?
2) Is pedestrian access to forklift travel areas restricted by barriers?
3) The walkways for pedestrians are well-marked?
4) Are "forklift in operation" signs visibly clear?
5) Are mirrors for pedestrians and drivers provided at blind spots?
6) Alterations or changes to the daily forklift schedule has been communicated to staff?
7) Are lift truck tires suitable for use on all operating surfaces?
8) Forklift seatbelt is being utilized?
9) The seat of the forklift is in good condition?
10) Is a regular forklift maintenance schedule adhered to?
11) Are annual checks of the forklift being done?
12) Is the forklift right for the required tasks?
13) Is there a load chart that is readable on the forklift?
14) Do all operators know how to read the load chart?
15) The chart lists the safe lifting capacity for all attachments and their uses?
16) Are the warning devices on the lift truck working properly?
17) The speed operating control device is secured properly?
18) The lift truck overhead cage is fitted right?
19) Do the operators of the lift truck have certifications to utilize the equipment?
20) Warning signs and speed limits are being observed?
21) Are forklift operators up to date on training for all kinds of lift trucks being used?
22) Forklift operators know their duties to report the damage to the machinery and other forklift incidences?
23) Is the pre-test checklist reviewed daily prior to the machine being operated?
