Order Picker License Markham

Order Picker License Markham - Order preparation operation or likewise called order picking as it is more commonly known is a method utilized within warehouse operations and consists of employees referred to as order pickers. The order picker's duty is to take and collect articles in particular quantities in order to accomplish the customer's orders before shipment. Order picking is a simple warehousing method. The efficiency in which this particular job is completed can be directly connected to a supply chain's productivity. Therefore, order picking is one of the most controlled logistic processes. Order picking falls within the category of the warehouse management system.

There are certain kinds of order picking which consist of: wave picking method, pick to box method, picker to part method or piece picking, zone picking method and sorting systems method.

The pick to box method involves the order picker only filling the boxes with item that are from their specific station. The box then moves on to other stations to until the order is done. In this method, there is no movement of the order picker employees. In the wave picking method, the order pickers move around so as to gather the needed items for numerous orders. The piece picking or picker to part method is similar where the order pickers or picker move so as to gather the stuff required but for one order only.

There is no movement by the order picker in the sorting systems method. Rather, things are delivered to the orderpicker by an automatic system like for example an automatic storage system or a conveyor system. In the zone picking method, each and every order picker is assigned to one specific zone. They are responsible for just realizing order picking in this particular zone.
